

PUERTO RICO STATE HEALTH INNOVATION PLAN DRIVER DIAGRAM

AIM

Transform delivery and management of health care services in Puerto Rico by testing innovative care models of prevention and management of high costs, complex-need populations.

A larger-scale implementation of these models should result in:

1. Per-capita total cost of care savings of at least 5 percent (vis-a-vis the 2014 baseline/trend) for the in-scope populations and
2. Improvements of at least 5 percentage points in key quality of care, health status and outcomes measures by calendar year 2020.
